# ARTIFICIAL INTELLIGENCE VS NATURAL INTELLIGENCE

Could artificial intelligence replace human intelligence?

We run an investigation by putting AI in the face of doubt, emotions and feelings and we showed that, in the face of love, there is no artificial intelligence that holds.

Starting from the analysis of a poem written by an Italian street poet, the students created decision trees to simulate the AI's neural network and to investigate how the heart plays a fundamental role in our choices, even the most rational ones.

Matches were born in which human intelligence tried to challenge the AI through interdisciplinary activities and, sometimes, the AI scored from the penalty spot.

In the eternal duel between artificer and nature, it is in the enchantment of the heart, in the inexhaustible creativity of the human soul, that supreme intelligence finds its dwelling
